

Heather Haycock

Regional Vice President

I am beyond grateful what Arbonne's 30 days to healthy living program has done for my health! I grew up a competitive dancer and have always had a small body frame. I always kept in shape because I danced about 20 hours a week and thought that that was healthy. I was extremely busy and ran to fast food places and ate out for many meals. Because I was in shape and exercised a lot, I absolutely thought I was healthy. I have always had bad acne, always felt tired, napped often, moody, I was becoming complacent, settling and just getting through my life. Even while being a Laker Girl and dancing on my college dance team, I felt these symptoms daily! I didn't know that I wasn't healthy until I did Arbonne's 30 day program! This program has changed my health and opened my eyes to fact that our bodies need nutrients in order to function properly!! Most people do not know how the human body is supposed to feel and I definitely have never felt better in my entire life. My acne has cleared up, I have so much energy, napping is something I cannot even do anymore, my hair and nails are healthier, i no longer get brain fog, I am so much happier and feel like I am living! This program has completely changed my life and health and I am just so grateful for it! It is a absolutely a blessing to share this program with others, I love it when others realize how health can impact their lives and make the change to put nutrition as a priority!! Amazing things happen and peoples' lives are transformed with this program! Be your best you and join us!
